The Chamber today

The Polish Chamber of Commerce for Agricultural Machines and Facilities is the apolitical, independent and self-financing organisation of industrial self-government representing a sector. Currently, over 100 companies from the sectors are its members. The largest Polish producers and distributors of machines and representatives of the global brands of agricultural machines and appliances belong to it.

The Chamber is an organisation operating at the national level, its main objective is improvement of conditions in which the Polish entrepreneurs operate. One of the most important tasks is to represent and protect group and individual interests of associated business entities.

Objectives and tasks

- integration of companies in the agricultural sector
- representation of common interests
- exchange of ideas and experience
- coordination of members activities
- cooperation with institutions associated with the agricultural sector, and with schools and universities
- organising of specialist trainings, seminars and conferences
- organising of the largest open-air agricultural exhibitions

PIGMiUR projects:

- ✓ agricultural exhibitions Agro Show
- ✓ trainings
- ✓ analyses and studies
- ✓ education activities
- ✓ legal counselling
- ✓ international cooperation
- ✓ sector meetings

www.agro-tom.eu

AGRO - TOM was founded in 2005. At the beginning, the production profile included stubble and disc aggregates. Along with the development of the company, the Agro-Tom range of machines was expanded to include innovative machines with widths over 3 m in which the company now specializes - multi-purpose and hydraulic machines account for 70% of sales. The basis of the brand's success is the production of the highest standard machines - we talk with our customers, we test machines in the most difficult conditions in order to 100% meet the expectations of our client and to develop agriculture.

The production of agricultural machinery is not only our work but also a passion. Particularly important awards received in 2018 by the company:

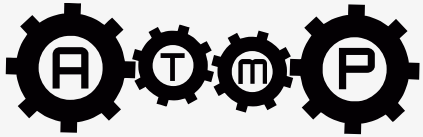

- XVIII Polish National Competition „Way for Success” for the best entrepreneurial activities in rural areas - LAUREATE name of the project Extension of the agricultural machinery production plant AGRO-TOM under the honorary patronage of the President of the Republic of Poland.
- Agricultural Machine of the Year 2017 in the national production machine category: GTH XL disc aggregate - AGRO-TOM Tomasz Kaniewski
- Gold Medal - Agricultural GTH XL disc aggregate with seeder for arable crops and fertilizers - International Agricultural Fair POLAGRA PREMIERY 2018

Products for agriculture:

- ✓ Simplified sowing machines
- ✓ Drills: mechanical, pneumatic
- ✓ Plows
- ✓ Disc aggregates, cultivating, cultivating and sowing
- ✓ Stubble cultivators, stubble harvesters
- ✓ Multitasking aggregates, Cultivators
- ✓ Subsoilers, Flattening shafts
- ✓ Fertilizer spreaders
- ✓ Rakes
- ✓ Machines for vineyards and orchards

ATMP

Manufacturer Of Agricultural and Municipal Machines

Leśniewice 54, 09-500 Gostynin, Poland
phone: +48 / 24 387 17 30
phone: +48 / 669 224 202
fax: +48 / 24 386 21 03
e-mail: biuro@atmp.pl
www.atmp.pl

Products for agriculture:

- ✓ reinforced drag harrows and meadow rollers
- ✓ bale and wood grabs
- ✓ innovative seedbed cultivators
- ✓ disc ploughs
- ✓ forks for bales and manure
- ✓ universal and capacity shovels
- ✓ forks with grapple and shovel-crocodiles

Machines for municipal and construction services:

- ✓ snow ploughs
- ✓ street sweepers
- ✓ concrete and feed mixers

The company ATMP has been operating in the agriculture market since 2007. It started its operations by manufacturing snow ploughs for quad vehicles. It's quick development resulted in expansion of the range of municipal machines and of accessories for tractors and loaders. The offered products met with great interest in the Polish market, and soon they were offered by foreign dealers.

The aim of the company is combining modern technologies with proved solutions, as well as improving standard of machines by using Polish materials of the highest quality, including:

- hydraulic systems and working components for machines, of Waryński brand;
- rubber in components replaced with more durable polyurethane.

An individual approach to needs of customers needs by customising attachments to any machine contributes not only into an increase in sales, but, what is more important, into satisfaction of our clients. ATMP machines are presented at agricultural fairs in Poland, Germany, France, Ukraine, Romania, Belgium, Sweden, and Czech Republic, as well as in Africa and Kazakhstan.

Krukowiak

Kujawska Fabryka Maszyn Rolniczych Sp. z o.o.

ul. Kolejowa 54
87-880 Brześć Kujawski, Poland
phone: +48 / 54 252 10 27
fax: +48 / 54 252 10 54
e-mail: poczta@krukowiak.com.pl
www.krukowiak.com.pl

The history of the company KRUKOWIAK started at the end of 1970 at a farm of Marianna and Józef Borkowski in Redecz Krukowy. Their son, Janusz, attempted to modernise the farm, however, at that time Polish agriculture had to deal with shortage of agricultural machines, and for many this barrier was impossible to overcome.

Due to a great need for machines, in 1977 already a Workshop was founded at Mr Borkowski farm, manufacturing various agricultural devices, mainly simple cultivating equipment and cages for transport of animals. But a real success was achieved with a mounted sprayer constructed by Janusz Borkowski. Using the experience gained this way and renown amongst farmers, in 1987 Janusz Borkowski transformed

the said Workshop into a company called KRUKOWIAK. With the robust development of the company, the farm in Redecz Krukowy became too small for the company needs, so at the beginning of this century a plant of a former POM in Brześć Kuawski was purchased and the company has been operated there to this date.

Recently, a generational change has occurred at the company, when the founder and creator of KRUKOWIAK passed the company to his sons, Seweryn and Radosław Borkowski. Under their management, in June 2016 the company purchased a company POM Brodnica, manufacturing a wide range of cultivation machines. This way KRUKOWIAK became a foundation for KRUKOWIAK GROUP.

Products for agriculture:

- ✓ suspended – mounted sprayers *HEROS* and *OPTIMAL*
- ✓ trailed sprayers *APOLLO*
- ✓ trailed sprayers *GOLIAT*
- ✓ trailed sprayers *ORION*
- ✓ self-propelled sprayers *HERKULES*
- ✓ orchard sprayers *TAJFUN*
- ✓ specialist sprayers
- ✓ machines for cultivation and harvesting of onions
- ✓ machines for cultivation and harvesting of potatoes
- ✓ sorting machines for vegetables, feeders

MEPROZET KOŚCIAN S.A. company is one of the leading and one of the largest producers of slurry tankers in Europe. Our history is over 45 years of experience in the design of these machines, experience that translates into reliability, durability and modernity.

As one of the leaders in this segment of agricultural machinery, we urgently follow the trends of modern agriculture, we listen to the needs of users, in order to be able to provide a product that will be able to satisfy them, and hard work has become less onerous. Our history is over 55 000 thousand pieces of manufactured machines. It is 27 export markets, more than 50 trade partners in Poland and over 60 abroad.

From the beginning of slurry tankers production, our company has a dynamic and passionate design department which develops new technical solutions every year. We present these solutions with pride at many agricultural exhibitions in the country and abroad. In order to increase the development potential and innovativeness of our products, we established in 2015 a new company Zakład Badawczo-Rozwojowy AGRO Sp. z o.o. The effects of this company's work could be admired during the AGRO SHOW 2018 exhibition, when we presented the REXAGER premium brand slurry tankers, part of the precision agriculture.

Products for agriculture:

- ✓ Slurry tankers
- ✓ Disc blade injectors
- ✓ Dribble bars
- ✓ Storage containers for liquid manure

Offer for municipal:

- ✓ Slurry container with multilift system
- ✓ Vehicle-mounted tanks

www.metalfach.com.pl

Products for agriculture:

- ✓ baling presses
- ✓ bale wrappers
- ✓ front loaders
- ✓ accessories for loaders
- ✓ mixing wagons
- ✓ manure spreaders
- ✓ agricultural trailers
- ✓ cultivating units
- ✓ Nova trailers for vehicles Nova
- ✓ Heating boilers

Metal-Fach employs about 800 employees and is one of the largest employers in the region. It manufactures agricultural machines, central heating boilers, trailers for trucks and steel constructions. Starting as a small enterprise employing a few people, the company has developed into a robustly operating and modern company. It made this major developmental leap within a relatively short time. Beginnings of Metal-Fach reach back to 1989. During its first years the company specialised in production of heating boilers. 2010 was a turning point, as then the enterprise decided to launch a new

category of products into the market: trailers for trucks under the Nova brand. Today, the company is mainly known as a manufacturer of agricultural machines. Its products are valued in Poland and abroad, with export of 65 percent of its production. Nowadays, Metal-Fach machines can be found in 31 countries, in which the company has over 80 trade representatives. Our largest markets abroad include Baltic States, Russia, Kazakhstan, Ukraine and Belarus.

SaMASZ Sp. z o.o.

ul. Trawiasta 1
16-060 Zabłudów, Poland
phone: +48 / 85 664 70 31
fax: +48 / 85 664 70 41
e-mail: samasz@samasz.pl
www.samasz.pl

Products for agriculture:

- ✓ drum mowers
- ✓ disc mowers
- ✓ flail mowers
- ✓ rotary tedders
- ✓ rotary rakes
- ✓ mixer feeder
- ✓ municipal machinery
- ✓ extension arms
- ✓ snow plows
- ✓ sand spreaders

SaMASZ is at the forefront of manufacturers of farming machinery in Europe. We are a solid company with ambitions in innovations and constant strive for the development.

We are aware of the fact that tillage is a complex process, comprising many different interacting factors. For this reason, as a company involved in constructing of farming machinery, we follow closely the global trends on the agricultural market, and very often set them ourselves. Our long-time experience makes us able to see things that are not such apparent to those who are less aware of the trade. Up until now, we have managed to already manufacture more than 95,000 mowers and other farming machines. Our company cooperates with more than 50 companies in Poland and 70 abroad. In 2015

SaMASZ set the Guinness World Record which still remains unbeaten. Using a set comprising 3 disc mowers, within 8 hour time, we have managed to mow an area of 96.2 ha. Therefore we proved the record capacity of the machinery of our manufacture.

We put passion into our products and closely collaborate with our clients, so that the machines of our manufacture meet the most important needs of farmers. Nowadays what counts the most is cleanliness of the harvested fodder, achieved by using highly accurate mowing mechanisms of our concept. Clean fodder, as is known, is the most valuable feed for the cattle, and use of our machines ensures collecting clean crops.

UNIA Sp. z o.o.

ul. Szosa Toruńska 32/38
86-300 Grudziądz, Poland
phone: + 48 / 56 451 05 00
fax: + 48 / 56 451 05 01
e-mail: marketing@uniagroup.com
www.uniagroup.com

Products for agriculture:

- ✓ ploughs: bed, reversible
- ✓ cultivation and sowing units and sets
- ✓ sowers: mechanical, pneumatic
- ✓ mowers: disc, drum
- ✓ presses, press wrappers, wrappers
- ✓ spreaders
- ✓ potato harvesters and planters
- ✓ trailers, transport platforms
- ✓ sprayers - orchard, vegetable
- ✓ grain storage: silos

UNIA - the brand developed since 1882. The largest Polish producer of agricultural machines. It was founded by engineer August Ventzki who in 1882 established a Factory of Agricultural Machines and Tools in Grudziądz. The very beginnings of the factory in Grudziądz started with production of the first machine in 1882. It was a double-furrow plough constructed in harsh conditions of the first workshop. Each year new products were created, and in 1898 Alfred Ventzki presented his gallows plough during the ploughing competition in Rothehaus in Westphalia. This product put everybody else out of the competition winning the first prize. This tool, continuously modified and improved, with hundreds of thousands manufactured and sold, established the position

and renown of the company from Grudziądz in the market of agricultural machines. With high quality of its products and good position in the market the factory from Grudziądz was one of leading companies in the contemporary Europe. In 1973 UNIA was transformed into a group of companies under a name: Agromet-Unia Fabryka Maszyn Rolniczych, and in 1983 it started a large investment at facilities located in Grudziądz. Currently UNIA Group consists of four factories, in Grudziądz, Brzeg, Słupsk and Kąty Wrocławskie. It employs nearly 1350 people, and manufacturers ca. 25,000 machines every year. The export level approaches 50% of the company income.
